WaterSmart Landscape Awards Now Accepting Nominations

The 3rd Annual WaterSmart Landscape Award Program, offered by the City of Anaheim Public Utilities Department in partnership with Anaheim Beautiful, is now underway. Residents and businesses that have converted their lawn to a climate appropriate landscape are eligible to submit their properties for nomination.

“Even though we have received plenty of rain over the past few months, we are still in a drought situation and when property owners make the change to water saving landscaping, it makes a tremendous impact,” said Sandra Sagert, Anaheim Beautiful President. “By partnering with Anaheim Public Utilities, we hope to inform our members about the contest and help spread the word to residents and businesses throughout the City. We share the same goal of preserving the beauty of our city, while conserving our resources.”

Properties considered for the award will be judged in four categories including: appropriate plant selection, project creativity, landscape design and irrigation system. The deadline is April 28, 2017 and nominations can be received through an [online application](#), Emailed to savewater@anaheim.net or by calling 714.765.4274.
